

BUILT TO CROSS ANYTHING.

India's first overland brand, engineered to a global standard for the terrain that defines this country.

WHY WE EXIST

INDIA'S FIRST OVERLAND BRAND BUILT TO GLOBAL STANDARDS

For years, the serious Indian overlander had two bad options. Import gear built for other continents and other vehicles, and pay a fortune for kit that never quite fit a Thar's roof or a Spiti winter. Or settle for something local that looked the part until the first real pass. AdventureX4x4 exists to end that compromise. We build expedition equipment to a global standard, here, for the way India actually drives.

A global standard is not a marketing line. It is measurable. It means four-season shells that hold their shape at -30°C in Kaza, not just on a showroom floor. It means fabrics, poles and mounts rated against load, wind and cold, then proven on the routes we name: Spiti, Ladakh, the Rann, the high passes where there is no second chance and no tow truck waiting.

It means honest fitment. A tent we list for a Jimny goes on a Jimny. A mount we sell for a Fortuner is torqued to a number we will stand behind. Every specification in this catalogue is real, tested and written down, because the desert and the snowline do not grade on effort. They grade on whether the gear holds.

We are an Indian company building for Indian terrain and Indian 4x4s, to a bar set by the best in the world. That is the whole brief. Everything in these pages is made to be lived in, far from the road, when the weather turns and the equipment is all that stands between you and a very long night.

INDIAN-TERRAIN TESTED

THE ROOFTOP RANGE

EIGHT ROOFS. ONE STANDARD.

The rooftop-tent range spans eight tents, from aerodynamic all-aluminium hardshells that deploy in seconds to featherweight softshells sized for the Thar and the Jimny. Each is classified by shell, sleeping capacity and the terrain it was built for, so the right tent for your rig and your route is never a guess.

TENT	SERIES	SHELL	FROM
CampTop 250 Rooftop Tent	CampTop	SOFTSHELL	₹76,990
CampTop 300Lux	CampTop	SOFTSHELL	₹94,990

CAMPTOP SERIES · SOFTSHELL

CAMPTOP 250 ROOFTOP TENT

Your first night above the trail

The CampTop softshell entry point seals against the weather the moment it opens, with hot-stitched waterproof seams and a 250kg aluminium base that mounts to almost any rig. It sleeps up to three under a waterproof sky window, turning the dunes of Jaisalmer or a Ladakh pass into your basecamp.

CAMPTOP 300LUX

Softshell simplicity, expedition-grade comfort

This CampTop softshell pairs a 300kg aluminium honeycomb base with a thermal-control mattress and dual heater ports, so you sleep warm through a Spiti winter and cool through a Rajasthan summer. Globally sourced materials and 3000mm-plus waterproofing back the comfort, and it still folds away in seconds.

CAMPTOP SERIES · HARDSHELL

CAMPTOP 400MAX

Room for the whole crew

The CampTop flagship hardshell is the only tent in its class with a polycarbonate shell, riding on an aerospace-grade aluminium frame and carbon-fibre floor rated to 400kg. A seven-by-seven-foot interior, tri-colour dimmable lighting and a waterproof sky window give families the space to spread out where ordinary tents run short.

CAMPTOP SERIES · HARDSHELL

CAMPTOP AERO-V ROOFTOP TENT

Cuts the wind, keeps the comfort

The Aero-V brings a full-aluminium clamshell to the CampTop hardshell line, its wedge profile shedding drag on highway runs while gas struts open it in seconds. Thirty percent more internal volume, heater and AC ports, and an anti-condensation base make it as liveable at a Ladakh altitude camp as it is fast on the road.

EXPEDITION SERIES · SOFTSHELL

LEOPARD41 EXPEDITION SERIES ROOFTOP TENT

India's only 540-degree view

The Leopard41 leads the Expedition softshell line as India's only rooftop tent with 540-degree panoramic openings, deploying in under sixty seconds on an aluminium honeycomb base that weighs just 41kg. DarkShield fabric blocks the harsh morning light and twin waterproof sky windows hold the stars. Built for explorers, not tourists.

BISON61

The Expedition series at its peak

The Bison61 is a one-piece aluminium hardshell on a honeycomb base, finished with German Stabilus struts, SBS zippers and a felt-lined insulated interior. Twin LED bars, two USB and two 12V sockets and a premium mattress make a Himalayan pass or a desert dune somewhere you actually want to spend the night.

FEATHERLITE SERIES · SOFTSHELL

FEATHERLITE

The lightest way to camp anywhere

The FeatherLite is one of the world's lightest premium softshell tents, its reinforced aluminium structure holding firm in Grade-7 winds while sparing your suspension, fuel and EV range. Every part detaches and swaps individually, so you can service it yourself mid-expedition and keep it on the roof for years.

AUTONEST SERIES · HARDSHELL

AUTONEST 120

Open and shut in under a minute

The AutoNest hardshell deploys and packs down in under sixty seconds from a remote, its all-aluminium build keeping the whole tent to just 63kg. A pre-installed 54W solar panel, redundant power connections and optional heating keep you charged, lit and warm even when the camp sits far off-grid.

★ FOR THE NATION

WE TRAVEL IN THEIR DEBT.

The high roads we travel were carved by the Border Roads Organisation and held by the soldiers who stand watch at the edges of this country. To both we owe every kilometre of this catalogue. We honour that debt the only way the land allows: by travelling with respect, carrying out everything we carry in, and leaving the mountain exactly as the men before us kept it.

THE OVERLANDER'S PLEDGE

- ◆ I will leave no trace but tyre tracks.
- ◆ I will respect the people whose home this is.
- ◆ I will honour the soldiers and the Border Roads Organisation who make the journey possible.
- ◆ I drive for the love of this land — and to be worthy of it.

JOIN 2,522+ OVERLANDERS · WWW.ADVENTUREX4X4.COM/FOR-THE-NATION

**THE ROAD RUNS OUT.
THE JOURNEY DOES
NOT.**
